

Student Portal Overview

Learning to use the student portal

VOICE-OVER – Welcome to TexasAssessment.gov, where you can learn everything you need to know about your child’s performance on the STAAR test!

To get started, pull out your child’s STAAR report card which you should have received from your local school, and locate the unique access code featured on the cover of the report.

If you don’t have your child’s STAAR report card, no problem! Click the “FIND MY ACCESS CODE” link at the bottom of the purple login box to have your code provided to you.

Once you’ve used the code to log in, you’ll find yourself on the Test History page, which is a complete transcript of all the STAAR tests your child has taken over the years.

Click on any subject under the current school year to navigate to the Test Results page, where you can see how well your child performed, compare their score to other kids in their school and district, and see how much they grew academically from one year to the next.

For those interested in the test itself, the Detailed Results and Test Questions tabs allow you to see your child’s response, the correct answer, and the learning category that was covered. By drilling down one more level, you can also read the actual questions from the test and view rationales for each correct answer.

Now that you know your way around, you are ready to help your child succeed academically!
